[3] The cleanliness classes specified for components must be adhered to in hydraulic systems. Effective filtration prevents malfunction and, at the same time, prolongs the service life of components.

For the selection of filters, see data sheets RE 50070, RE 50076, RE 50081, RE 50086, RE 50087 and RE 50088.

[4] Due to the surface temperatures of solenoid coils, observe standards ISO 13732-1 and EN 982!

When making the electrical connection, properly connect the protective earth conductor (PE ⏚).
